Basel Epidemiology Seminar

Save the date for the upcoming

Basel Epidemiology Seminar on

Zooming in on Feasibility and Data Quality Assessments - Part 2 -

Following our most recent seminar on the topic on 16th Sept at Novartis, where talks on malaria routine surveillance and a risk-based data quality framework for a post-authorisation safety study were presented to help address the question of how to establish whether a data source is fit to study a particular research question, we aim to continue zooming in on feasibility and data quality assessments and hearing from five new speakers and their concrete real-world data (RWD) study use cases.

We will hear about data sources from federated networks and linked national registries to specialized EHR databases, and discover how robust data curation supports regulatory safety studies, rare disease research, and confirmatory evidence generation.

Save the date for the second seminar on 25th November and watch out for the announcement of the agenda (coming soon).

Save the date:
Wednesday November 25th, 2026
14:00-16:30pm CET
(no remote participation)

Venue:
Hoffmann-La Roche Ltd
Auditorium in Building 92
Grenzacherstrasse
Roche Campus, Basel

Registration:
This seminar is free of charge.
Please register here by 20th November for in-person attendance:
https://forms.cloud.microsoft/e/TYpbQDMkLF
(No remote participation is possible for this seminar.)

Basel Epidemiology Seminar (BES) is an independent, non-profit forum for discussion between epidemiologists. More information can be found here: https://baselepiseminar.github.io/home
